Architetture per esterni

CONTRACT DIVISION

A FEW EXAMPLES OF REALISATION OF STRUCTURES WITH THE MAIN GOAL TO OFFER PROTECTION FROM SUN OR RAIN AND BAD WEATHER CONDITION FOR THE TOURISTIC, GASTRO, SPA AND CATERING INDUSTRY

Unosider SRL operates since almost 20 years in the outdoor market with the main aim to create outdoor spaces where our client can relax and get protection on a sunny day while enjoying a nice a book and a glass of nice wine, celebrating a special event with family and friends even in a cloudy or rainy day, having a dinner with a magnific view straight on a Mediterranean beach, mountain lake, city square or sweet countryside with no need to be worried about any external condition.

For restaurants, hotels and any "public place", our covering structures represent a chance to gain extra space for more hosts or differentiate the offer to clients willing to organise a special event.

Unosider realisation have not only a functional value, where there's a wide offer, but also a decorative function that enriches and mark with style all the surrounding space.

Choosing a gazebo or pergola from Unosider it is like a weeding with the attention to small details, tailored service, and everything involved in the word Bottega Italiana.

PROJECT 1: Hotel Des Bergues - Four Season, Genève Suisse

PROJECT 2: Hotel Palace Roma Italy

PROJECT 3: Sabbia e Sale, Chioggia Italy

PROJECT 3: Chateau De Bournel, Bournel France

PROJECT 4: Relais Villa Abbondanzi, Faenza Italy

PROJECT 5: Hotel Cipriani Belmond, Venice

PROJECT 6: Dino Zoo Park, Charbonnières-les-Sapins, France

Hotel Des Bergues - Four Season

Genève, Suisse

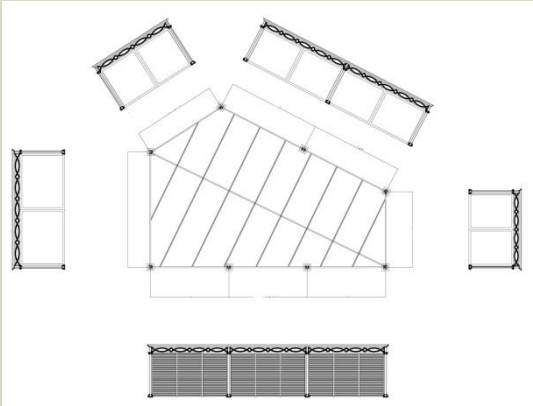

Following the renovation of the 6th and 7th floor of the Hotel with a new restaurant and a SPA, this project was born with the aim to convert the terrace at the rooftop in a sushi restaurant with an astonishing view on the lake of Genève/Léman.

The development has been done together with the technical office of the Hotel and the Architects working on the renewal of the spaces.

The most delicate aspect of this structure where the fixation at the ground, the low height of the roof imposed by the municipality and the strong winds blowing from the lake.

The shape of this pavilion was also very odd and the finalisation of such a challenging project has been an important step for the company.

The Church Palace Hotel

Rome, Italy

A new opening of the Hotel with several gazebos aimed to adorn the outdoor spaces and a tunnel of M5x3 defining the main entry. This tunnel has been the real masterpiece to manufacture: metal frame with a tight canopy roof on which we sewed the Hotel Logo,, led panels on the inside for illumination and atmosphere, special made posts with gold rings for a luxury feeling.

In the same venue we manufactured a bespoke gazebo based on the Mood design but enriched with the classical Novecento beam

Sabbia e Sale

Chioggia, Italy

This project is being developed with a restaurant straight on the beach on the Adriatic coast. Part of the structure is already done and installed. A part will be finished during the winter.

Far from our typical decorated style, this work had to respect the desire of our client to have a contemporary image. We used minimal profiles , grids and all white was a must.

Heaters, lights and PA system are integrated in the structure, as well as vertical awnings in crystal for protecting from the chilling winds.

Chateau de Bournel

Bournel, France

The pergola installed at the Chateau de Bournel/Golf club, is a standard pergola Malatesta fitting perfectly the place and surrounding architecture. Working on historical building is very delicate and it is important to respect the original design and atmosphere.

Pergola Malatesta can be made-to-measure and also the frame colour can be adapted to the existing metal parts or RAL, often requested by the municipalities.

The thick profiles we use allow to build up pergolas with a depth up to 6,5M and therefore the possibility to cover large areas with no posts in the middle. Roof is completely waterproof and in this case fix.

As a fact our range includes also a retractable roof system

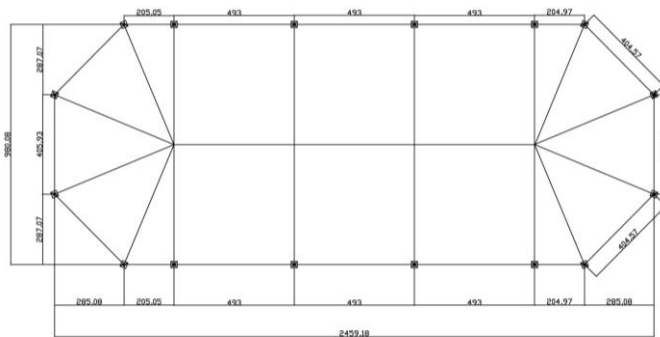

Relais Villa Abbondanzi

Faenza, Italy

Unosider has built up a solid partnership with this client and friend now. During those years we have built several structures for Villa Abbondanzi and still have projects for the future.

The structure in the picture is a special made Malatesta gazebo with 2 absides. Specially made for weddings and events it features no posts in the middle and a very smart false ceiling in acrylic fabric to ornate the inside and hiding the roofbars. Curtains and lighting is also very special.

Regular plan with a central area and 2 absides.

Measure: M24,6 x 9,8

Solution with no posts in the middle

Hotel Cipriani Belmond

Venice, Italy

Set in a dreamy location, on the Giudecca Island in the middle of the lagoon of Venice, Hotel Cipriani is a real eden for the most demanding travellers with its top class service. Unosider set up four gazebos Novecento Prestige for an event organised from UK and the hotel is setting a new location for the structures to be a permanent part of the swimming pool area.

DINO ZOO Park

Charbonnières-les-Sapins, France

Located in the typical countryside landscapes of the Franche-Comté, DinoZoo is an impressive amusement park for families. Among its facilities, the terrace of the main restaurant needed a shading structure of large size and very irregular shape matching the configuration of the outer area. The roof in copper mounted on sandwich hard panels mm40 is an aesthetical choice for an "old style" look and also functional, for a stronger resistance to possible snows, frequents in this region. Allaround the outer side, a metal fence decorated like the main beam of the structure ornates with style this masterpiece.

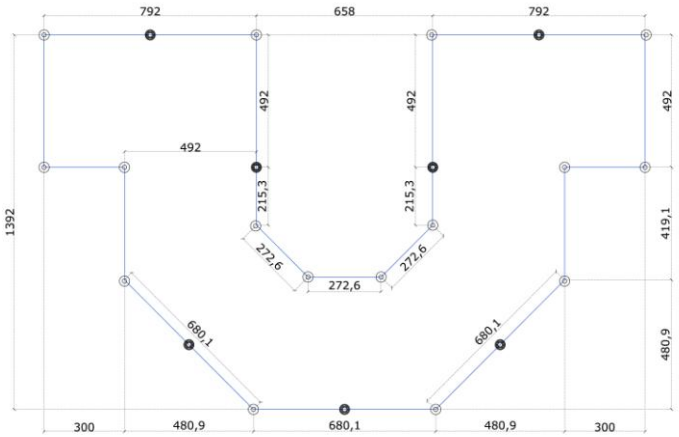

trial of the roof at the factory
