- 4 IDENTITY
- 5 EARTH

**Migliorare l'ambiente
costruito non dipende
solamente da nuove
tecniche e materiali,
bensì da un nuovo
modo di pensare**

Che cos è la sostenibilità?

**5 litri Gasolio
al giorno e testa**

2000 W

A photograph of a glacier flowing through a mountain valley. In the foreground, a yellow sign with a white arrow pointing right and a red stripe at the tip is mounted on a white post. The sign reads "2000 W" in bold black letters. Above the sign, a yellow text box contains the text "5 litri Gasolio al giorno e testa" in bold black letters. The background shows a large glacier with a dark, rocky moraine, surrounded by steep, rocky mountains under a clear blue sky. Some green vegetation is visible on the lower slopes of the mountains.

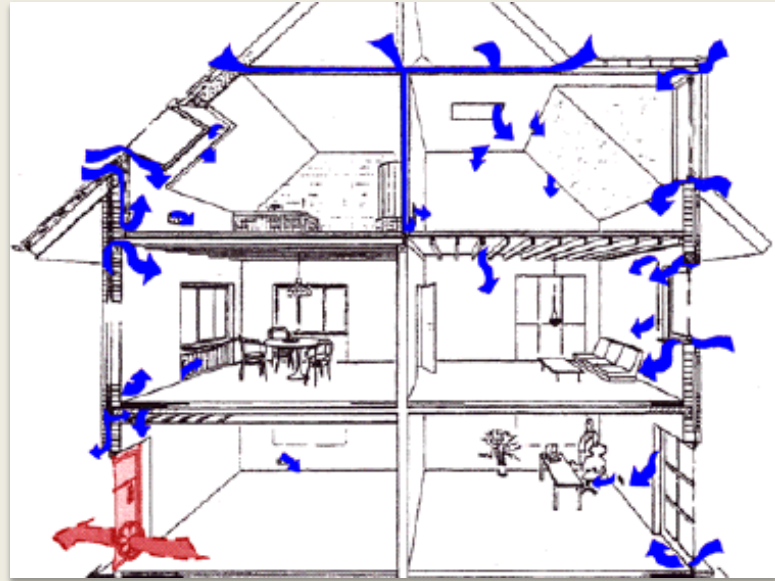

1° Efficienza e risparmio

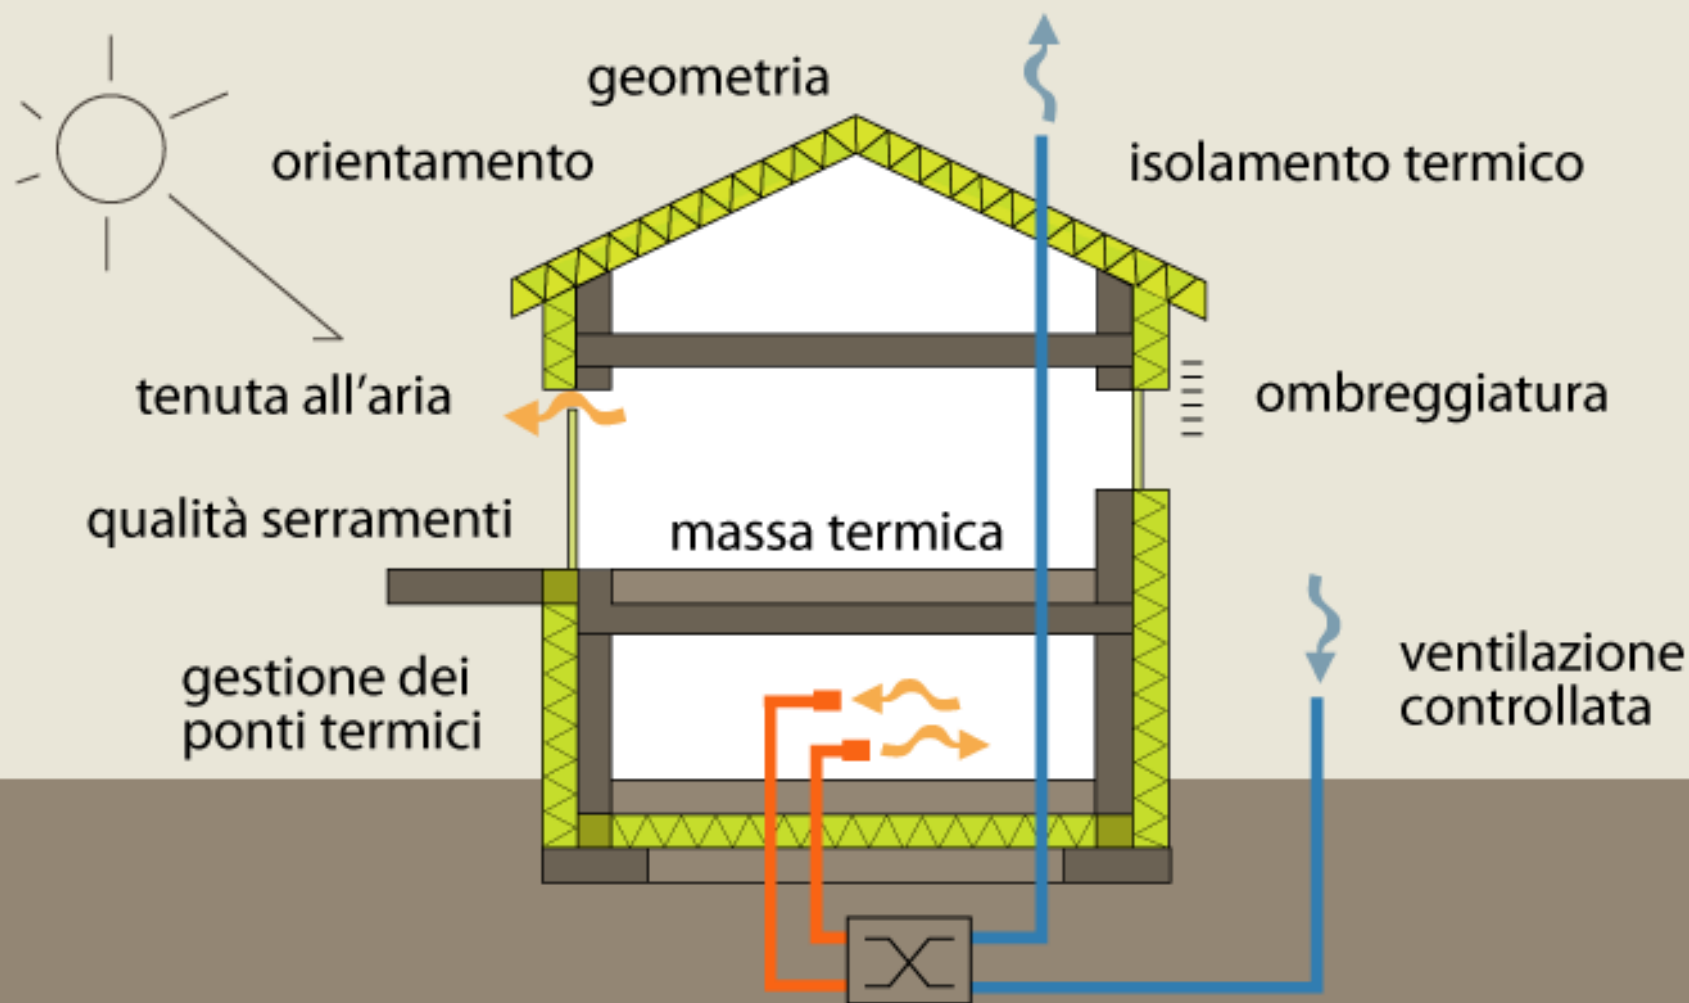

2° Impiantistica

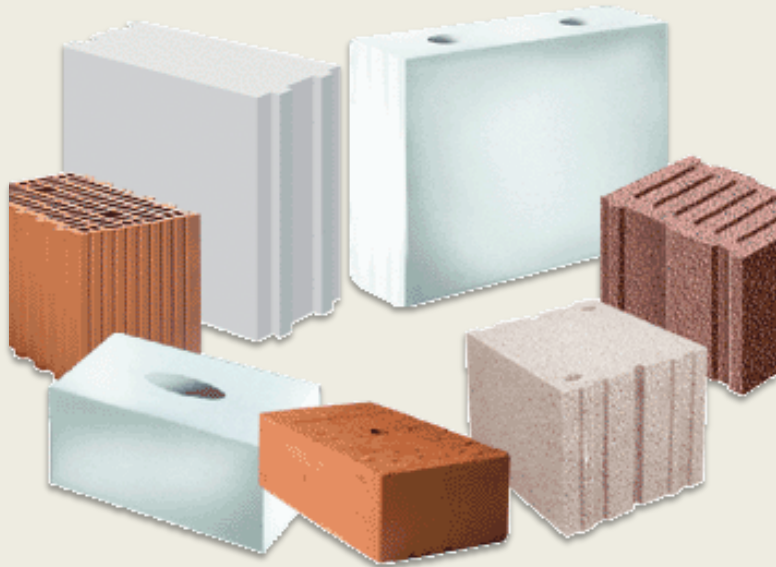

3° Gestione

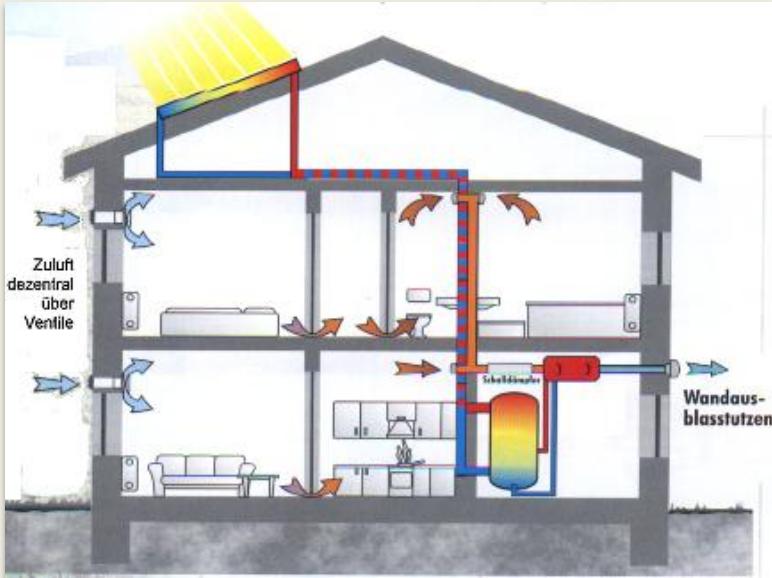

**Rispettare
le priorità**

Principi delle costruzioni efficienti dal punto di vista energetico

Le case del futuro

Energy Plus

Un'immediata ricorrenza all'efficienza energetica nell'edilizia è la più grande opportunità economica e sociale
