

SLIDE®

DNA Karim Rashid

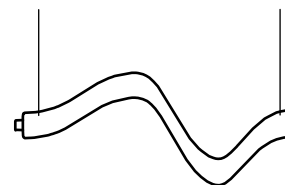

Product code: LP DNA200

Lights

Material

Polyethylene
Steel (cables)

Lighting Colours

Born from the collaboration with the volcanic designer Karim Rashid, DNA creates a weave of lights, colours and suggestions, all illuminated with the LED technology.

DNA is a modular element of 2 meters length, with the possibility to interlace it to create an enlightened spiral. We can define it as a revisiting of traditional luminous decorations

Dimensions in cm and weight in kg

height	width	depth	weight
